

ENTRE_VET PROJECT

Informative newsletter from the first period of the project.

About the project

What is the aim of ENTRE_VET?

ENTRE_VET seeks to collaborate in the European Commission mission to improve entrepreneurial education in the EU. There is currently an imbalance between the expectations of EU recommendations regarding entrepreneurship education, and the realities in EU VET schools, where there is a need for tools that support the inclusion of entrepreneurship competences in VET education.

Following this need, ENTRE_VET seeks to produce materials to help achieve the aims of the Osnabrück Declaration. The project will complement the competences officially stated by each EU country in the VET curricula. VET trainers have a key role in the acknowledgement, interest and understanding of entrepreneurship by their students. They can help them participate in the needed change of the EU economy towards a more resilient, entrepreneurial network.

Kick off Meeting

Partners met in Pärnu, Estonia

The first meeting of the ENTRE_VET project, led by the Estonian VET school PVEC and involving partners from Spain, Germany, Belgium, Slovakia and Greece, took place on 11-12 June.

Representatives from all the schools met in Pärnu (Estonia), at the PVEC school; during the meeting, a map of activities was drawn up to achieve the project's objectives. ENTRE_VET aims to increase entrepreneurship among VET students by helping them to acquire the necessary skills to run a business. To this end, activities will be created to bring them closer to local entrepreneurs, while educating them in a MOOC with specific content for entrepreneurs.

What's next?

- Partners have carried out the first round of ENTRE_VET surveys among students. Results are available in the ENTRE_VET first Infographic!
- Partners will carry out the first ENTRE_VET Workshop with students at the beginning of the 2024-2025 course.
- The ENTRE_VET MOOC will get started very soon!
